<b>ACADEMIC BACKGROUND</b>	<b>PhD in Astrophysics</b> <a href="#">Observatoire de Paris</a> , Université Paris Sciences et Lettres (PSL), France <a href="#">ED-127: Ecole Doctorale Astronomie et Astrophysique d'Ile de France</a>	Oct 2024 - Present
	<b>Master in Space Science and Technology</b> <a href="#">Observatoire de Paris</a> , Université Paris Sciences et Lettres (PSL), France	Sep 2022 - July 2024
	<ul style="list-style-type: none"><li>• Grade: 17.4/20 (Très Bien - Highest Honours)</li><li>• Total Coursework: 120 ECTS, Research Credit: 67 ECTS</li><li>• International Incoming Mobility Grant</li></ul>	
	<b>Bachelor of Science in Physics (Advanced Major)</b> <a href="#">Korea Advanced Institute of Science and Technology</a> (KAIST), Daejeon, South Korea	Feb 2019 - Aug 2022
	<ul style="list-style-type: none"><li>• GPA: 3.67/4.3 (Percentage: 93%)</li><li>• Total Coursework: 137 KAIST Credit (4 academic year), Research Credit: 8</li><li>• Honors Student, Excellence in Leadership and Volunteer Activity, KAIST International Scholarship</li></ul>	
<b>SKILLS</b>	<b>Programming:</b> Python (Astropy, Pandas, GalPy, Plotly, PyTorch), R, C, ADQL <b>Relevant Softwares:</b> TOPCAT, AstroImageJ, MATLAB, Origin <b>Operating Systems:</b> Windows, Linux (Debian) <b>Language:</b> English (C2), French (Basic), Bangla (Native), Korean (Basic)	
<b>RESEARCH EXPERIENCE</b>	<b>PhD Project</b> <a href="#">GEPI (Galaxies, Stars, Physics and Instrumentation)</a> , Observatoire de Paris, France <b>Title:</b> Reevaluation of the Dynamical Masses of Local Group Galaxies <b>Supervisor:</b> Dr. François Hammer, Dr. Yanbin Yang <ul style="list-style-type: none"><li>• Modeling the MW - Gaia Enceladus/Sausage (GSE) merger to reproduce observational properties of the MW</li><li>• Adjusting the M31 merger to fit the observed rotation curve</li><li>• Modeling dwarf infall to evaluate IGM and CGM densities of the Local Group</li></ul>	Oct 2024 - Present
	<b>Galaxy Rotation Curve</b> <a href="#">GEPI (Galaxies, Stars, Physics and Instrumentation)</a> , Observatoire de Paris, France <ul style="list-style-type: none"><li>• Analysis of the MW rotation curve, MW-like galaxies in the cosmological simulations, and the M31 rotation curve from observations and merger modeling</li></ul>	May 2024 - Present
	<b>M2 Internship</b> <a href="#">GEPI (Galaxies, Stars, Physics and Instrumentation)</a> , Observatoire de Paris, France <b>Title:</b> Re-evaluation of the Local Group Timing Argument <b>Supervisor:</b> Dr. François Hammer, Dr. Yanbin Yang <ul style="list-style-type: none"><li>• Re-calculating the local group mass using the timing argument by taking into account the major merger at the M31</li></ul>	Jan 2024 - Present

**Lab Insertion Units (LIU) and M1 Internship** Sept 2022 - Dec 2024

**GEPI (Galaxies, Stars, Physics and Instrumentation)**, Observatoire de Paris, France

**Title:** Origin of the Dwarf Galaxies and Globular Clusters in the Milky Way Halo

**Supervisor:** Dr. François Hammer, Dr. Yanbin Yang

- Calculated orbits of MW Dwarf Galaxies and Globular Clusters under different MW mass models using GAIA-EDR3 data
- Investigated the existence of new structures based on angular momenta, close approaches, and similar orbit of the dwarfs in the Vast Polar Structure (VPOS)
- Investigation of high energy dwarfs to be originated from a 2-3Gyr old M31 major merger tail models under different MW potential and M31 proper motions
- Found 6D association between tidal tail models and LMC related dwarfs. First indication of matter exchange between M31 and MW and explanation for VPOS.

**Bachelor Thesis and Research Internship** June 2021 - April 2023

**Toruń Astrophysics/Physics Summer Program**, Nicolaus Copernicus University, Poland

**Title:** Polarimetric Study of Stars with Planets and Circumstellar Disks from the Kepler Field

**Supervisor:** Prof. Agnieszka Słowikowska

- Performed data reduction and analysis using AstroImageJ and Astropy for the polarimetric observations of ~50 stars in the Kepler field with planets and/or circumstellar disks from RTT150 telescope with WeDoWo Polarimeter
- Investigated correlation between polarisation degree of target stars and interstellar medium (ISM), planetary & stellar parameters and polarimetric variation over time. Was presented at the [EAS 2022](#) and followed up using the Shane Telescope.

## PUBLICATIONS

1. F. Hammer, Y. B. Yang, P. Amram, L. Chemin, G. A. Mamon, J. L. Wang, I. Akib, Y. J. Jiao, H. F. Wang, [Dark matter fraction derived from the M31 rotation curve](#), *Astronomy & Astrophysics*, 2025
2. F. Hammer, Y. J. Jiao, G. A. Mamon, Y. B. Yang, I. Akib, P. Amram, H. F. Wang, J. L. Wang, L. Chemin, [The Milky Way accretion history compared to cosmological simulations](#), *Astronomy & Astrophysics*, 2024

## EDUCATION AND OUTREACH

- Supervision of an M1 student's research project 2024
- Student Ambassador and Student Buddy at Université PSL 2023-Present
- Tutor for General Physics and Physics major Lab course at KAIST 2021-2022
- Mentor for freshman students at KAIST and the Physics department 2020-2022
- Academic mentor for [IPhO](#) and [IJSO](#) Bangladesh team 2017-2022
- Writer for physics and astronomy at a [science magazine](#) 2017- Present
- Conducted workshops on research methodology, experiments, and astronomy data analysis for high school and university students at [SPSB](#) 2017- 2022
